REPORTS:

From Siam Times August 25th. The Chinese Merchant bound from Hongkong to Bangkok, reports .--July 10, saw a full rigged ship attacked by pirates and probably captured, close to Cap

The vessel was attacked by three junks firing kept up about one hour between the ship and junks. The Captain supposes from appearances that the vessel must have been captured, as she was run into a bay North of Cape Verella.

The Chinese Merchant was chased by the three junks, but fortunately a breeze favored his escupe. The Captain says, that he had neither arms nor ammunition to defend himself had he been attacks .- Ibid. Sept. 8th. H. I. M. gun-bont, Entrecastoaux was attacked by thre piratical junks on July 10th after 2 hours hard fighting sho was obliged to take shelter near Cape Verella. The junks were lashed together lengthways and were heavily armed but they suffered much damage from the gun boats firing. During the fight the pirates managurered their boats with oars. After the gnn-boat had been driven away, the China Merchant being in sight they made away after her but a breeze springing up she escaped, as montioned in our last issue.

By the S. S. Wyckoff, from Saigon, We have received further particulars regarding the attack made by pirates on H. I. M. at Hue. After receiving some dozen to prevent this large sum of money falling into their hands; the gun-boat din not qui the fight till the piratical junks had suffered severely from her gans. The Commander and officers of the Entercasteaux, are well known in Bangkok and much respected during their visit here.

The master of the Siamese barque Marion, which left this port for Hongkong, on 8th | bes. May last, when off the Gookina China coast told the Supercargo there was a short supply of water and fire wood on board, and winded him to go on shore in one of the vessels boats to a place about 8 miles off, where Cap Fargerstrom (Russian), said he had previously obtaned supplies. The Chinchen and his clerks accordingly went ashore, but directly they had landed und were out of sight, Fargerstrum ordered sail and went away with the vessel. It is supposed the Marion will be taken to California. The officers and orew were composed of a strange medley of Russians, Gor-

mans, English and Americans. The Marion was originally an American barque, built at Battimore, and was sold here in November last, for 10,000 dollars

The Schome of a Local Bank for this Colony with Branches at the most important places in China, Law | Shanghas. been in contemplation for a very long period.

The local and foreign trade in Hongkong and at the open ports in China and Japan lies increased so rapidby within the last few years that additional Banking beilities are felt to be required. The Banks now in China being only branches. of Corporations whose hend quarters are in England or India, and which were formed chiefly with the view of carrying on exchange operations between those countries and China, are scarcely in a position to deal satisfactorily with the local trade which has become so much more extensive and varied thun in former years, This deficiency the Hongkong and Shanghai Banking Company will supply and will in fact

assume the same position with relation to this Colony as the Presidency Banks in India, or the Banks of Australia in their respective localities. The Establishment of a Mint in Hongkong, providing an adequate supply of proper currency will render a local Banking medium queential carry out its operations, and the almost certain disappoarance of the existing Comprideric system (so for as money is concerned) will also ensure Banks becoming in course of time the exclusive medium for the transaction of the monetary opeprosperity which has attended the working of to accept such Shares or any less number which

Imperial responsibilities as will justify the Home Government in claiming the patronage of the amountment of their officers. It tright that the Home Government should ippoint the Governor, the Chief Justice the Attorney General, and even the heads of the leading departments, because it is a political necessity that H. M. Ministers should have the Bank of British Columbia direct influence over the legislature of the A PARLY PAPER, imaged every morning, Sunday colony—but no such necessity can exist with the result of which is speculative, and the profit or loss whereof, depending entirely on Terries for Advertising - The obels range of the good or bad management, are to be received week from Monday to Salarday is recknown as one energion or good or bad management, are to be received repetition; Sutarday being in all cures deemed the termination.] or borne by the colony. Surely nepotism and good management cannot go hand in handneither is it possible for a colonial governobstructs them. Therefore in a pecuniary poin of view the Home Government are virtually robbing the colony when they thus of abuse the patronago which they unrighteonsly claim. The Lords of the Treasury themselves lai down the qualifications for the Master of the Mitti: those qualifications have been disropolitical patronago has supervened and if the Mint should prove a losing affair the colony must bear loss.

> WE hear that the Portuguese community being desirous of building a Grand Stand fo themselves on the Race Course, applied some months ago to the Surveyor General for a suitable site. The application was favorably entertained, and a piece of ground was promi sed, but up to this time nothing has been done the promise standing unredeemed The idea of the projectors was to order an

iron structure from England of a simple y for the above Company in China, are prepared to elegant design, and we make no doubt the Issue Policies upon Marine Risks, at current rates with good management, the affair hight be managed very economically and effectively of premious.

We further learn that overtures have been mude to the leading men in the undertaking, with the view of forming a combination with the Race Committee, and entering late hr. rangements for the construction of a large Grand Stand, on a scale commensurate with the full requirements of the colony

We would strongly advise the Portuguese community to have nothing to do with such an amalgamation. They will find that magnificent ideas will set all arrangements and celculations at definice that the estimates will be fully expended before the building is hall finished-that it will be heavily in debt, and that as much more as was originally calculated will be required to complete to That it wil have to be mortgaged for the remaised mount, and that when it shall finally be completed, it will prove a regular botch and will require extensive alterations to render it

We feel great faith in our prognostications because no architect in Hongkong could ever have had any any experience in the con struction of Grand Stands, and they seem, us a rule, to ba above availing of the experience of those in England whose practiced knowledge would be instructive to them. The same remark applies to drains, seawalls,

roads, streets, bridges, 8tc. No architect in Hongkong ever learnt practically how fo contract such works, and let the reader observe the dreadful mess, that has been junde of them. The Hongkong architects have learnt to build houses, and in that respect they excel -but as for tubular bridges, grand stands, tunnels, convict bulks, theatres, wharves &c they are simple lyros and experimentalists. Besides -the Portuguese community ha much better be by themselves. How is possible there can be any pleasure in the contemplated amalgamation when such people as Mr. Ronnic, the briginal Jarry and Tweeds, ale tolerated by the British community

Surely I lie would not hesitate to insult the

Volunteer corns in the manner he did at the

club, he would care little for the Portuguese, should a conflict of ideas prayail on the part of the fair sex at the Grand Stand. The step too would serrogate the upper class of Portuguese from the lower, which is not the wish of either to effect. Far better that they should bave their own Grand Stand and enjoy the reunion which would naturally result, without embarrassinenter interlecencer

PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY NOTICE OF REDUCTION OF PASS.

AGE MONEY.

IN the year 1857 the Directors made a consider Passage Money, which continued in force till 1861. In that your owing to the extraordinary rise in the Cost and Freight of Couls, and the enhanced prine of all descriptions of Naval Stores, the Directors were reluctantly compelled to return to the rates of Passage Money previously in force. They are now bappy to state that a decrease to the price of Coal and other expenses of Stoam Narigution enables them to reduce the Company's Passage rates to the undernoted scale, which will take offsot from and after the lat June nort, viz.

His Majesty, it is said, undertakes to form the railway at his own cost, and will, of course, expect to reocive all the profits of the undertaking. That it is the present intention of the King to promote this important work, we cannot doubt; but how far he may be disposed to carry it on as his own, nobody can positively say. Mr. Barlow, has just returned from Mandalay and gives out, we hear, that he has been most successful in treating with His Majesty for permission to outstruct a railway to Chius. Mr. Barlow, as our renders will remember, represents the London firm of Messrs, Halliday, Fox & Co. he was sent to Ave for the express purpose of obtaining a grant, or congession, from the king for a railway; and was especially directed to avoid the route advocated by the Marses. Sprve. It would appear then that, after conceding to Mr. Barlow all that gentleman asked for. His Mejesty has now resolved that he also will have a railway. - in fact two railways. we presume, are to be made.
